DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose generating a process time line using said operational parameters, said flow diagram, said set of scheduling cycles, said offsets and said tasks for each of said sequence of unit operations, wherein said tasks include a unit operation set up task, a unit operation execution task, and a unit operation clean up task, and wherein said process time line is primarily impacted by each said unit operation execution task relative to a respective offset, wherein said unit operation set up tasks and said unit operation clean up tasks impact said process time line secondarily in a back calculating and forward calculating manner with respect to corresponding unit operation execution tasks, respectively, whereby said process time line is used as a tool for batch processing, facility design and/or resource planning. The allowability, at least in part, resides in this fact.
